Company profile:

Döbeln Elektrowärme GmbH is your competent partner for the development, production and sales of copper and stainless steel electric heating elements of various designs for energy conversion and solar technology.

Due to in-house manufacturing and an internal tool engineering department the company is able to react to customer requirements quickly and in a flexible way, providing solutions on time and with high quality. Our product-responsible engineers will offer you comprehensive advice with creative and solution-oriented ideas. Competent and capable sales partners are available all over Europe to support and advise our customers.

Manufacturing- / delivery programme:

Fluid Heating, Air Heating, Tool Heating, Radiation Heating

- Round tubular copper and stainless steel heating elements
- Barbecue and fireplace lighters
- Screw-in heating elements
- Flange radiators
- Continuous-flow heaters
- Heater batteries
