Company profile:

digicolor, founded in 1978, is a leading supplier of material management systems for the plastics industry in the field of injection molding, extrusion and compounding. Headquartered in Bielefeld/Germany, digicolor is developing and producing high-class products for conveying, drying as well as mixing and dosing of plastic granules respectively masterbatches. As a further core competence digicolor is offering an extensive programme of granulators for recycling of technical polymers.

A major focus is development, project planning and installation of automated and energy-efficient drying, conveying and dosing plants.

Offering innovative products and practical solutions digicolor is a long-standing, reliable partner for the automotive, electro, electronic, medical, and packaging industry.

Manufacturing- delivery programme:

Conveying systems
Dosing systems
Temperature controllers
Material storage
Drying systems
Granulators
Industrial cooling systems
Controls

Patented digicolor
pipe-hose-couplings

Quick couplings
made of stainless steel

Service & Support:

- Professional support
- Installation, optimization and regular maintenance
- Check of quality-relevant process parameters: Measure-ment of dew points at single dryers, Measurement of residual moisture

Drying, Blending, Cooling, Feeding, Grinding, Temperature Controlling, Process Monitoring, Dosing
