Company profile:

Deutsche FOAMGLAS® GmbH is a 100% subsidiary of Pittsburgh Corning Europe S.A. and was established in 1969. FOAMGLAS® cellular glass is manufactured from unlimited resources of silica sand, dolomite, lime, which are naturally occurring raw materials. The insulation product is totally free from ozone depletion gases (like HCFC, HFA etc.) and does not contain any binders or flame retardants.

FOAMGLAS® insulation products are designed to meet the requirements in building and industry applications.

In the German market Deutsche FOAMGLAS® GmbH is represented by a number of regional offices where highly trained sales engineers provide expertise to the customer. Our staff members give full technical support, including site instruction and supervision.
