Company profile: Test laboratory, accreditation in accordance with DIN EN ISO/IEC 17025

Testing, monitoring, quality control and consultation.

Static and fatigue tests (LCF and HCF) on material and components. Material tests on polymers and metallic materials at room temperature and different climate conditions (temperature, humidity, chemical media).

Development of machines for solar heating and cooling.

Manufacturing- / delivery programme:

Testing materials

Life endurance tests (LCF, HCF)
Testing materials and components
Polymer material testing
CIPP (Cured In Place Pipes) testing

Optimization of mechanical components

Mechanical static and dynamic tests
High temperature tests

Flexural cycling tests
Rotational bending tests
High pressure tests (5000 bar).

Development

testing apparatus and test rigs
energy-saving technologies

Products

Dynamic test devices
Test rigs and devices.

Analysis & Studies

Optimization of mechanical components
Stress-/ Strain analysis
Feasibility studies
Value engineering

Instrumentation

Test equipment
Scores of testing machines.
